**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
  - Group I, claim(s) 1-34, drawn to a method for dressing a grinding surface.
  - Group II, claim(s) 35-39, drawn to a method for controlling the z-position of a slide.
  - Group III, claim(s) 40-42, drawn to a control circuit for controlling the z-position of a slide.
  - Group IV, claim(s) 43-45, drawn to a machine for supporting and positioning a work-piece.
4. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group I is the method steps for dressing a grinding surface and this feature is not properly or positively recited in the claims of Group II. In addition, the special technical feature of Group II is the method for controlling the z-position of a slide and this feature is not recited in the claims of Group I. Therefore, unity of invention is lacking.
5. The inventions listed as Groups I and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the

same or corresponding special technical features for the following reasons: the special technical feature of Group I is the method steps for dressing a grinding surface and this feature is not properly or positively recited in the claims of Group III. In addition, the special technical feature of Group III is the control circuit for controlling the z-position of a slide and this feature is not recited in the claims of Group I. Therefore, unity of invention is lacking.

6. The inventions listed as Groups I and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group I is the method steps for dressing a grinding surface and this feature is not properly or positively recited in the claims of Group IV. In addition, the special technical feature of Group IV is a machine for supporting and positioning a work-piece and this feature is not recited in the claims of Group I. Therefore, unity of invention is lacking.

7. The inventions listed as Groups II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group II is the method steps for controlling the z-position of a slide and this feature is not properly or positively recited in the claims of Group III. In addition, the special technical feature of Group III is the control circuit for controlling the z-position of a slide and this feature is not recited in the claims of Group II. Therefore, unity of invention is lacking.

8. The inventions listed as Groups II and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group II is the method steps for controlling the z-position of a slide and this feature is not properly or positively recited in the claims of Group IV. In addition, the special technical feature of Group IV is a machine for supporting and positioning a work-piece and this feature is not recited in the claims of Group II. Therefore, unity of invention is lacking.

9. The inventions listed as Groups III and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group III is the control circuit for controlling the z-position of a slide and this feature is not properly or positively recited in the claims of Group IV. In addition, the special technical feature of Group IV is a machine for supporting and positioning a work-piece and this feature is not recited in the claims of Group II. Therefore, unity of invention is lacking.

10. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

11. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

12. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
